Forecast for Monday 13 Jun 2022

Weather: Cloudy or overcast with occasional rain and drizzle through much of the morning, this most persistent on west facing slopes. Brightening up into the afternoon, with a fair amount of sunshine to close out the day. High to very high UV levels, especially if the cloud breaks earlier into the afternoon (most likely towards eastern summits).

Chance of cloud-free hill tops above 800m: 30% until mid-morning, increasing to 90% thereafter.

Low Cloud and visibility: Broken or banks of cloud above 300-400 metres, especially on western coastal hills, and occasional patches above 400 metres in association with drizzle elsewhere, until mid to late morning. Cloud bases then rising above summits for the remainder of the day. Poor visibility in any drizzle, perhaps presenting some early navigational challenges, otherwise very good visibility expected, with distant hills clearly seen.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Less cold at height than over the weekend, and feeling warm in sheltered valleys by the afternoon. Adequate protection again the sun is recommended.

Forecast for Tuesday 14 Jun 2022

Weather: Largely dry with sunny spells, and just the outside chance of a passing light shower. Best of the sunshine later in the day. Very high UV levels.

Maximum wind: West or southwest, 10-15 mph.

Chance of cloud-free hill tops above 800m: 50% until soon after dawn, then >90% thereafter.

Low Cloud and visibility: Occasional patches of cloud above 400 metres, mainly in the west, until soon after dawn. These lifting, leaving the mountain clear of cloud for the remainder of the day, Very good visibility.

Temperature: **Valleys:** Plus 5 Celsius, rising to plus 18 Celsius.
At 800m: Plus 5 Celsius, rising to plus 8 Celsius.
Freezing level: Well above the summits.

Wednesday	Dry with light winds throughout, as well as plenty of sunshine, which may be hazy at times. Becoming very warm by the afternoon, with very high UV levels. Adequate amounts of water and sun cream is recommended.
Thursday	Very similar conditions compared to Wednesday, but with increasing warmth and perhaps humidity too. Dehydration and heat stress could become an issue for some, especially on long climbs.
Friday	The fine, settled weather continues, with prolonged sunshine and high temperatures and humidity, along with very high UV levels. To mitigate against dehydration and heat stress, ensure adequate water supply and protection against the sun, and perhaps favour walking early or late in the day. Perhaps becoming a bit breezier later in the day.
